ARTTU TUOMINEN

Software developer

ABOUT ME

I'm a backend-focused software developer with 4+ years of experience working with .NET and C#, building and maintaining APIs for real production systems. I've focused on observability and system reliability - implementing OpenTelemetry and working with Azure Application Insights to improve logging, debugging, and production monitoring. I actively support the team in diagnosing issues and understanding system behavior through logs and telemetry.

WORK EXPERIENCE

Jun 2024 - Present
Saima Soft Oy, Full-time, Remote
Software Developer
Maintain and develop legacy backend systems built on .NET, supporting internal business-critical applications for StaffPoint Oy. Implemented distributed tracing and logging using OpenTelemetry and Azure Application Insights, becoming the primary developer responsible for observability and debugging workflows. Monitor production systems, analyze logs, and resolve issues impacting real users, improving system reliability and incident response.

Jul 2023 - Jun 2024
Finnish Defence Forces
Military Service

Dec 2022 - Jul 2023
Saima Soft Oy, Full-time, Remote
Software Developer
Worked on a legacy .NET Framework (4.8) backend system, focusing on bug fixing, API testing, and access control validation. Created internal documentation and improved system understanding within the team.

Dec 2022 - Jul 2023
Part-time, Remote
Junior Developer
Worked alongside studies (3 days/week), transitioned between part-time and full-time periods. Maintained and developed backend services for internal applications while working alongside studies. Contributed to feature development and bug fixing in a .NET Core system. Participated in modernization efforts, upgrading the application from .NET Core 3.1 to .NET 8.

Nov 2021 - Feb 2022
Internship, Remote
Intern
Started as a trainee, focusing on bug fixing and understanding a complex legacy backend system.

Jan 2021 - Feb 2021
Kärkäinen, Internship, On-site
Intern
A school work placement, the topic of which was selling and customer meetings. I mainly shelved products and suggested and sold products that customers asked for.
