EXPERTISE

- .Net development
- Object-oriented programming
- Problem-solving
- Testing and debugging
- Test Automation
- Postman
- Azure

LANGUAGE

Finnish (**Native**)

English

ABOUT ME

Backend-focused Software Developer with over 4 years of experience in C# and .NET, skilled in building and testing APIs, and improving backend systems.

Keen interest in embedded systems and IoT solutions, demonstrated through personal projects with ESP32 firmware using C and React Native mobile app integration using TypeScript.

EXPERIENCE

Saima Soft Oy, 2021 - Present, *Remote*

Software Developer

- Developed and maintained API using .NET framework and C# programming language.
- Collaborated with cross-functional teams to troubleshoot and resolve software issues efficiently.
- Collaborated in agile team on backend architecture and features
- Performed +100 access control tests for API endpoints using Postman
- Gained hands-on experience in fullstack development, contributing to frontend features using TypeScript and modern frameworks (e.g., React), while primarily focused on backend services.
